Detailed Estimates These machines generate an impressive amount of hydraulic power to lift more, move more and dig faster than any other product on the market. The choice of contractors and rental organisations, the Boxer is one of the most versatile, reliable and productive miniskid steers in the world. The 120 Trencher is the only unit in its class to feature a springloaded trencher boom and standard crumber assembly. The springloaded boom helps retain even chain tension and allows for roots, rocks and debris travelling around the end roller. It is designed to compress, removing much of the stress to the head shaft and reducing chain wear. The adjustable crumber assembly keeps loose dirt in the trench close to the chain for a cleaner finished trench. Another key feature is the ergonomically designed operator's control station with all controls accessible for twohand operation. Because of its small size and ease of operation, the 300 Series units are ideal for the rental and hire industry. The 300 Series has a tip capacity as high as 1325lbs. 600kg and an operating capacity as high as 464lbs. 210kg at 35 per cent tip load. These compact machines provide the strength to perform a variety of tasks, and, at 34.

5inch 88cm wide, the 320 and 322D diesel have no problems getting into and out of tight areas. The 525DX features a redesigned hydraulic package, providing smoother drive controls and improved simultaneous functionality. Narrow the unit to fit through tight areas and expand the tracks for additional stability. The machine also features a hydrostatic operating system, improved ergonomics and creature comforts such as operator hip and thigh padding, cup holder and 12volt auxiliary power supply. The X7 is a powerful, aggressive chipper. It features a larger diameter chipping disc and greater material pulling and clamping force than others on the market to quickly and easily power through material. The X7's compact and lightweight design makes towing a breeze, while the machine's wide stance promotes visibility on the road. The size of this track is 180x72x36. Boxer offers a dedicated trencher plus three model They then introduced the "Boxer " line of mini skid steers somewhere around late 2006 or 2007, which for the most part, has been a good machine. The original Prowler line was then rebranded as the Boxer line. The Power House name was dropped. The new Boxer 526DX has a Perkins 3 cylinder motor in it, which is a real work horse.
