Turn the ring to "WIDE" direction to make the image larger, and turn to "TELE" direction to make the image smaller. FOCUS ADJUSTMENT Turn the FOCUS RING to adjust the projected picture focus. If the picture has keystone distortion, correct image with KEYSTONE adjustment. This function is cancelled when the NO SHOW button is pressed again or any other function button is pressed. PICTURE FREEZE FUNCTION Press the FREEZE button on the Remote Control Unit to freeze the picture onscreen. This function is cancelled when the FREEZE button is pressed again or any other function button is pressed. The projector cannot discriminate or detect the input Go to PC adj. If this happens, the projector cannot reproduce a proper image and the image may be recognized as a flickering picture, a nonsynchronized picture, a noncentered picture or a skewed picture. Select the resolution at the Display area dialog box, or adjust the number at the column of "H" or "V" to match the resolution of the image. Quit Closes the PICTURE IMAGE ADJUSTMENT MENU. The normal picture level is preset on this projector at the factory and can be restored anytime you press the NORMAL button located on the Top Control or on the Remote Control Unit. Press the MENU button and the ONSCREEN MENU will appear. Another dialog box AUTO IMAGE MENU will appear. Press the MENU button and the ONSCREEN MENU will appear. PICTURE SCREEN ADJUSTMENT This projector has a picture screen resize function, which enables you to display the desirable image size. Press the MENU button and the ONSCREEN MENU will appear. Quit Closes the PICTURE IMAGE ADJUSTMENT MENU. The normal picture level is preset on this projector at the factory and can be restored anytime you press the NORMAL button located

on the Top Control or on the Remote Control Unit. The POINT buttons and the two CLICK buttons are used for the wireless mouse operation. When WARNING TEMP. Indicator continues to flash, check the items listed below. <http://birdbrook.co.uk/userfiles/innova-service-manual-pdf.xml>

The Ventilation slots of the projector may be blocked. In such an event, reposition the projector so that the ventilation slots are not obstructed. Allow the projector to cool for at least 45 minutes before you open the lamp cover. The inside of the projector can become very hot. Do not drop the lamp assembly or touch the glass bulb. The glass can shatter and may cause injury. The problem may be with your graphics controller rather than with the projector. When you reconnect the projector, remember to turn the computer and monitor off before you power up the projector. Do not attempt to open the cabinet. If the problem still persists after following all operating instructions, contact the sales dealer where you purchased the projector or the service center. Give the model number and explain the difficulty. We will advise you how to obtain service. Ask your question here. Provide a clear and comprehensive description of the issue and your question. If you do not see the LCD lamp module you are looking for in the listings below, call Please select your multimedia projector below in order to access the latest manuals and get access to online technical support resources and troubleshooting. Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. If the problem still persists, contact the sales dealer where you purchased the projector or the service center. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam. If not, it may result in a fire hazard. If the projector is to be built Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning. This will prevent damage due to lightning and power line surges. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturers instructions, and should use a mounting kit approved by the manufacturers. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn. This projector should never be placed near or over a radiator or heat register. Never spill liquid of any kind on the projector. If you are not sure of the type of power supplied, consult your authorized dealer or local power company. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it. Refer all servicing to qualified service personnel.

Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation. Unauthorized substitutions may result in fire, electric shock, or injury to persons. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. If such changes or modifications should be made, you could be required to stop operation of the equipment. This is a safety feature to be sure Do not try to defeat this safety feature. The projector utilizes builtin multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display LCD technology. It is designed to

carry and work anywhere you wish to use. There is no need for troublesome manual adjustment of frequency and other settings. The resolution from the computer between SVGA 800 x 600 and SXGA 1280 x 1024 is compressed into 800 x 600 dots. This projector cannot display image of over 1280 x 1024 dots. When the resolution of your computer is over than 1280 x 1024, reset the computer output for lower resolution. Keystone Correction solves this problem by digitally altering the projection to produce undistorted images. The Projection Lamp is automatically turned on again when the projector detects the signal or any operation button is pressed. This function enables you to operate both projector and computer with this Remote Control Unit only.

Pay attention to the following to ensure proper ventilation and avoid a possible risk of fire and malfunction. Obstructions may block cooling air. When using or installing the projector, the following precautions should be taken. This area will become hot while the projector is used. The projector automatically selects the correct input voltage. It is designed to work with singlephase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. Confirm the AC plug type with the chart below. The proper AC power cord must be used. If the supplied AC Power Cord does not match the AC outlet, contact your sales dealer. Projection angle can be adjusted to 7.6 degrees. When this projector is not in use for an extended period, put it into the case carrying bag supplied with this projector. Do not transport the projector through a courier or transport services with this bag. The projector can be damaged. When handling the projector, do not drop or bump the projector, subject it to strong forces or put other things on the cabinet. This may cause damage to the projector. To transport the projector through a courier or transport service, consult your dealer for best way. Occasionally, the micro processor may malfunction and need to be reset. This can be done by pressing the RESET button with a pen, which will shut down and restart the unit. Do not use the RESET function excessively. When connecting the Macintosh computer, the MAC Adapter not supplied is required. Turn the projector and peripheral equipment on before the computer is switched on. Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. Please also check your spam folder. Weighing a mere 6 pounds, it delivers an impressive 850 ANSI Lumens for breathtaking and memorable presentations. Easy to use, and packed with features, the LV5110 is perfect for all your needs. At a blazing.

Multimedia Projector Owner's manual LV5110 TO THE OWNER Before operating this projector, read this manual thoroughly and operate the projector properly. This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. Improper operation may result in not only shortening the productlife, but also malfunctions, fire hazard, or other accidents. If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section of the end of this booklet. If the problem still persists, contact the sales dealer where you purchased the projector or the service center. Do not stare directly into the lens as possible. Newest Added LTC24380SB BH12LS38 CKSTDF102SS 2014 Toyota Avalon ZET2RM3SS Eye damage could result. Be especially careful that children do not stare directly into the beam. If not, it may result in a fire hazard. Minimum distance should be taken. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat buildup can reduce the service life of your projector, and can also be dangerous. SIDE and TOP REAR 50cm 50cm 50cm q Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes. Canon Projector. The internal 3LCD technology is an innovative 3chip design that sets itself apart by delivering vibrant, true to life images with better color brightness and a wider color gamut. During the warranty period for the Lamp, Canon will, in its sole discretion and without charge, exchange a defective Lamp for a new Lamp. Except as set forth herein, this Limited Warranty does not cover consumable items as to which there is no warranty or replacement. Warranty exchange or replacement does not extend the original warranty periods of the Equipment. **ADVANCED WARRANTY EXCHANGE SERVICE PROGRAM** The Advanced Warranty Exchange Service Program the "Program" is a program in which a replacement Product is sent to you by Canon and you return to Canon the Product you originally purchased, which becomes the property of Canon. To use the Program, contact a Canon Customer Care Representative using the applicable Canon contact information below. The Canon Customer Care Representative will attempt to diagnose the nature of the problem and, if possible, correct it over the telephone. If the Canon Customer Care Representative determines that the Product is eligible for coverage under this Limited Warranty and that the problem cannot be corrected over the telephone, a reference number and an End User Activation Form will be issued to you. Submission of your signed End User Activation Form the "Form" will activate your request for an exchange, and the terms and conditions in the Form will govern Canon's provision of services under the Program. When you call, have your Product serial number and your date of purchase available to expedite service.

A Canon Customer Care representative will attempt to diagnose the nature of the problem and correct it over the telephone. If the problem cannot be corrected over the telephone, you will be asked to follow the applicable procedures for MAILIN SERVICE. Note that a dated proof of purchase is required at the time of service. This requirement will be satisfied by providing a copy of your dated bill of sale. You will be given the name, address and phone number of an authorized service center for the Product. It is your responsibility to properly package and send the defective Product, together with a copy of your dated proof of purchase, a complete explanation of the problem and a return address, to the authorized service center at your expense. Do not include any other items with the defective Product. The Product covered by this Limited Warranty and proven to be defective upon inspection will be repaired and returned to you without charge by the authorized service center. Any Product received by the authorized service center that is not covered by the Limited Warranty will be returned unrepared, or at the discretion of the authorized service center, you may receive a written estimate of repair at such cost as the authorized service center may establish from time to time. This Limited Warranty shall only apply if the Equipment is used in conjunction with compatible computers, peripheral equipment and software. The sole warranty, if any, with respect to such nonCanon brand item is given by the manufacturer or producer thereof.

Nor does this warranty i extend to any Equipment on which the original identification marks or serial numbers have been defaced, removed or altered, ii cover the adjustment of customeroperated controls as explained in the instruction manual, iii extend to any external interface equipment, iv apply to the cabinet or cosmetic parts, knobs or routine maintenance, or v cover uncrating, set up, installation, removal of the Equipment for repair or reinstallation of the Equipment after repair. During the warranty period for the Lamp, Canon will, in its sole discretion and without charge, exchange a defective Lamp for a new Lamp. Except as set forth herein, this warranty does not cover consumable items as to which there is no warranty or replacement. Warranty exchange or replacement does not extend the original warranty periods of the Equipment. When returning Equipment for warranty service, shipping charges must be prepaid and the Equipment must be

shipped in its original carton or box, or an equivalent. A bill of sale, or other proof of purchase, as well as a description of the problem, must be enclosed. This Limited Warranty shall only apply if the Equipment is used in conjunction with compatible computers, peripheral equipment and software. The sole warranty, if any, with respect to such nonCanon brand item is given by the manufacturer or producer thereof. If the problem cannot be corrected over the telephone, you will be asked to follow the applicable procedures for MAIL — IN SERVICE. Note that a dated proof of purchase is required at the time of service. Authorized service center information can be obtained by visiting www.canontechsupport.com US customers only or by contacting the Canon U.S.A., Customer Care Center or Canon Canada Customer Information Centre at 1800OKCANON 18006522666. You will be given the name, address and phone number of an authorized service center for the Product.

It is your responsibility to properly package and send the defective Product, together with a copy of your dated proof of purchase, a complete explanation of the problem and a return address to the authorized service center at your expense.
